Easy

Unnecessary trash is the worst. That's why Nesquik boxes are completely reusable. An empty box can be many things, but here will teach how to use it as a pot or planter, so you can grow your own plants at home!

Some ideas to get you started:

STEP 1 - Choose which plant you'll want to grow. Choosing the correct kind of plant for the size of our box is key!

STEP 2 - Make 4 or 5 holes on the bottom of the box. This allows for the excess water to drain when you water you plant.

STEP 3 - Add soil into the box, about halfway up.

STEP 4 - Insert the seeds you've chosen.

STEP 5 - Water it wisely. Some plants need more waters than other, make sure you know how much yours needs.
